PROFESSIONAL SUMMARY

Python Full Stack Developer with 6+ months of internship experience building live software for a B2B SaaS utility platform and an invoice-discounting fintech platform. Strong in Django, Django REST Framework, FastAPI and PostgreSQL, with frontends in React, HTML5, CSS3 and JavaScript. Built the end-to-end meter selection workflow for SMART360, resolved 50+ bugs, and shipped two live full-stack applications. B.E. in AI & ML; available immediately.

TECHNICAL SKILLS

Backend & APIs: Python, Django, Django REST Framework, FastAPI, RESTful API Design, Django ORM, SQLAlchemy, Celery, JWT, Google OAuth, Role-Based Access Control, Third-Party API Integration
Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Fetch API/AJAX, Responsive Design
Databases: SQL, PostgreSQL, pgvector, Redis, MySQL, SQLite
AI / ML & NLP: PyTorch, Neural Networks, NLP, NLTK, spaCy, Sentence-Transformers, Embeddings, Semantic Search, Cosine Similarity, Resume Parsing, Scikit-learn, Pandas, NumPy, Feature Engineering, SpeechRecognition, gTTS
Tools & Practices: Git, Docker, Postman, Linux, CI/CD, Vercel, Render, Agile, Code Reviews, API Testing, Debugging
Familiar with: Flask, MongoDB, Oracle SQL, Jenkins, AWS

EXPERIENCE

Backend Engineer Intern – Bynry Inc. **April 2026 – June 2026**
SMART360: AI-enabled, cloud-native utility management SaaS (water, electric, gas) *Pune, Maharashtra*

- Designed and built the end-to-end **meter selection and assignment workflow** in SMART360 (customer request, detail capture, meter selection, meter assignment), delivered from the second month of the internship.
- Built **10+ scalable REST APIs** with Django REST Framework, Django ORM and PostgreSQL for the live platform.
- Diagnosed and fixed **production bugs** across new and existing APIs by tracing root causes and shipping clean fixes.

Python Developer Intern – Monytics **January 2026 – April 2026**
Alternate investment platform for invoice discounting, connecting SMEs with investors *Pune, Maharashtra*

- Built new features across **frontend and backend** of the live platform based on business requirements.
- Resolved **50+ bugs** across website, data-processing and backend workflows by tracing root causes and validating fixes.
- Built Python automation and integration workflows that streamlined data handling and improved performance.

PROJECTS

Healthcare Appointment Booking System | *Django, DRF, PostgreSQL, JavaScript, Google OAuth* Live Demo

- Built a full-stack platform for patients, doctors and admins with **role-based access control** and DRF REST APIs.
- Implemented patient profiles, availability-based appointment booking and rescheduling, a ticket-style appointment pass, and map integration that guides patients to the doctor's clinic address.
- Enabled doctors to create medical records that patients can view and download; added status-based notifications (booking, confirmation, completion, new record) and a simulated payment flow. Deployed on Vercel.

AI Career Intelligence Platform | *React.js, TypeScript, FastAPI, PostgreSQL, pgvector, spaCy* Live Demo

- Built an AI-powered recruitment platform with two roles: candidates upload PDF/DOCX resumes, get automatic skill extraction, personalized job recommendations with **match percentages** and AI explanations of matched skills and gaps; recruiters post jobs, view ranked candidate matches and parsed resumes, and download resumes.
- Implemented **semantic matching** with spaCy and Sentence-Transformers (all-MiniLM-L6-v2, 384-dimensional embeddings stored in pgvector), combining skill overlap with cosine similarity to score matches beyond keyword search.
- Added JWT auth, role-based authorization and Celery/Redis background jobs; hosted on Vercel, Render and Neon.

Multimodal College Enquiry Chatbot (Final Year Project) | *Python, Django, PyTorch, NLTK* GitHub

- Built a web chatbot for ALARD University, Pune, answering enquiries on programs, admissions, fees, scholarships and placements through English text, English voice and Hindi voice (SpeechRecognition, Google Translate, gTTS).
- Trained a PyTorch feed-forward network on NLTK Bag-of-Words features to classify **53 intents**, combined with phrase and keyword matching in a seven-tier hybrid response pipeline; added login, session chat history and a personalized dashboard.

Music Recommendation System (Third-Year Project) | *Python, Pandas, Scikit-learn* GitHub

- Built a recommender covering preprocessing, feature engineering, model training, evaluation and hyperparameter tuning.

EDUCATION

Savitribai Phule Pune University, Pune **December 2021 – June 2025**
B.E. in Artificial Intelligence and Machine Learning *CGPA: 7.24/10*

CERTIFICATIONS & ADDITIONAL INFORMATION

Full Stack Development (QSpiders) · Python Programming (GUVI) · SQL (Infosys Springboard) · Machine Learning with Python (YHills) · Python Coder (Kaggle)
Languages: English, Hindi, Marathi **Availability:** Immediate
