PROFESSIONAL SUMMARY

Software Developer with hands-on experience in developing scalable web applications and RESTful APIs using Python, Django, Django REST Framework (DRF), and React.js, and growing hands-on experience to Agentic AI development with LangChain. Proficient in SQL, PostgreSQL, and Git, with strong problem-solving skills and a passion for building efficient, high-quality software solutions.

CORE SKILLS

- **Agentic AI & LLM:** LangChain, Prompt Engineering, OpenAI, Hugging Face
- **Programming & Frameworks:** Python, Django, Django REST Framework, Flask, ReactJS
- **Web Technologies:** HTML, CSS, Bootstrap, JavaScript
- **Architecture & Design:** Micro services, RESTful APIs, Scalable Backend Systems, Vector Databases
- **Databases:** MySQL, PostgreSQL, SQLite
- **Cloud Platforms:** Vercel, Neon
- **Tools & Practices:** Docker, Git, Postman, Power BI, CI/CD, JSON
- **Other:** API Development, Data Visualization, Debugging & Testing

PROFESSIONAL EXPERIENCE

Bynry Inc.

Backend Engineer Intern | Apr 2026 – Jun 2026

- Developed scalable backend services and RESTful APIs using Python, Django, and Django REST Framework (DRF) for production-grade enterprise applications.
- Designed and implemented backend business logic, database models, and API endpoints supporting consumer management and utility service workflows.
- Optimized PostgreSQL database queries, improving application performance and ensuring efficient data processing.
- Debugged production issues, resolved backend defects, and enhanced application reliability and maintainability.
- Collaborated with cross-functional Agile teams using Git to deliver high-quality software within sprint timelines.
- Participated in the complete Software Development Life Cycle (SDLC), including development, testing, deployment, and maintenance.

Monytics

Python Developer Intern | Oct 2025 – Apr 2026

- Developed Python-based backend modules and automation workflows for production applications in a collaborative development environment.
- Collaborated with the frontend team to develop responsive and user-friendly interfaces using **React.js**, improving overall UI/UX and user experience
- Wrote clean, reusable, and efficient Python code while adhering to coding standards and sprint deadlines.
- Assisted in database design, query optimization, and data validation to improve application performance and reliability.
- Utilized Git for version control and collaborated with cross-functional teams to deliver high-quality software within sprint timelines.

Yhills pvt.ltd

Machine Learning Intern | Feb 2024 – Mar 2024

- *Built an end-to-end **Music Recommendation System** using Python and Machine Learning.*
- Performed data collection, preprocessing, feature engineering, model training, and evaluation.
- Implemented collaborative filtering techniques to improve recommendation accuracy.
- Worked with **Pandas, NumPy, Scikit-learn, Matplotlib, and Jupyter Notebook.**

KEY PROJECTS

Doctor Appointment Management System

- Developed a full-stack healthcare application enabling patients to book, manage, and cancel appointments with doctors through a secure web interface.
- Developed backend in Python and Django; designed UI with HTML, CSS, Bootstrap.
- Built responsive and user-friendly interfaces, ensuring a seamless booking experience across multiple devices.

College Admission Enquiry Chatbot

- Built an AI-powered chatbot to automate college admission enquiries and provide instant responses to frequently asked questions.
- Applied Natural Language Processing (NLP) techniques and machine learning algorithms for intent classification and response generation.
- Reduced manual support efforts by automating common admission-related queries.

Personal Portfolio Website

- Developed a responsive personal portfolio website showcasing technical skills, projects, certifications, and professional experience.
- Built reusable React components to create a modern, interactive, and mobile-friendly user interface.
- Integrated GitHub, LinkedIn, and project repositories for easy access to professional work and achievements.

Music Recommendation System

- Designed and implemented a recommendation engine using collaborative filtering techniques to provide personalized music suggestions.
- Developed the complete machine learning pipeline, including data preprocessing, feature engineering, model training, and evaluation.
- Delivered an end-to-end recommendation system demonstrating practical machine learning implementation

CERTIFICATIONS

- Python Programming
- Machine Learning with Python
- Johnson & Johnson – Robotics and Controls Job Simulation
- Data Analytics
- Full Stack Development

ACADEMIC QUALIFICATIONS

Bachelor of Engineering | Percent 64.90 | 2025
Alard College of Engineering & Management, Pune

ACHIEVEMENTS

- Developed production-ready backend applications during internships.
- Built multiple full-stack and machine learning projects using modern technologies.
- Hands-on experience with REST API development, database optimization, and React frontend integration.
- Strong understanding of software engineering principles, Agile development, and scalable application architecture
