

ARYAN RATHOD

Python & Django Developer | REST APIs · DRF · PostgreSQL · AI/ML Integration
8767514749 | aryanrathod791@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Python & Django Developer with hands-on experience delivering production-ready REST APIs, data pipelines, and ML-integrated backend systems across real production environments. Holds a B.E. in Artificial Intelligence & Machine Learning (SPPU, 2025), enabling seamless integration of NLP and ML pipelines into Django/DRF backends — going well beyond standard CRUD development. Built real-world projects across healthcare, education, and music domains. Open to full-time backend or AI-integrated engineering roles.

TECHNICAL SKILLS

Backend & APIs: Python, Django, Django REST Framework (DRF), FastAPI, REST API Design, PostgreSQL, SQLite, SQL
AI / ML: Scikit-learn, NLP, Intent Classification, Collaborative Filtering, ML Pipeline Design, Feature Engineering, Pandas, NumPy, Model Training & Deployment, LLM Integration (Chatbot)
Tools & Practices: Jenkins, Git, Docker (basics), Postman, CI/CD, Agile/Scrum, TypeScript, JWT Authentication

PROJECTS

Doctor Appointment Management System

Python · Django · DRF · PostgreSQL

- Built a full-stack appointment booking system with role-based access for Patients, Doctors, and Admins using Django REST Framework
- Implemented JWT authentication, doctor availability scheduling, time-slot conflict detection, and automated appointment confirmation via email
- Designed PostgreSQL schema handling appointments, prescriptions, and patient history with data integrity constraints

College Admission Enquiry Chatbot

Python · NLP · Django · REST API

- Developed an NLP-powered chatbot to handle college admission enquiries covering courses, eligibility, and fee structure via a REST API
- Trained an intent classification model using scikit-learn on a custom corpus; integrated into a Django backend served through a REST endpoint
- Automated 80%+ of common admission queries, significantly reducing manual enquiry handling overhead

Music Recommendation System

Python · Scikit-learn · Collaborative Filtering

- Built end-to-end recommendation engine using collaborative filtering: data ingestion → preprocessing → feature extraction → model training → deployment
- Iteratively tuned hyperparameters and evaluated model accuracy metrics to improve recommendation relevance

EXPERIENCE

Backend Engineer Intern — Bynry Inc.

Apr 2026 – Jun 2026

- Built and maintained Python/Django REST APIs for production software serving live users in an agile sprint-driven team
- Developed scalable backend logic using DRF; contributed across the full software delivery lifecycle including code review and deployment

Python Developer Intern — Monytics

Jan 2026 – Apr 2026

- Delivered backend logic, data pipelines, and third-party integration workflows in a live production Python environment
- Wrote clean, maintainable code shipped consistently on sprint deadlines; contributed across the full IT services delivery cycle

Machine Learning with Python Trainee — YHills

Feb 2024 – Mar 2024

- Completed an intensive hands-on ML program building a Music Recommendation System independently from scratch within a 2-month timeline
- Gained practical experience across the full ML lifecycle: data collection, preprocessing, model selection, training, tuning, and deployment

EDUCATION

Bachelor of Engineering (B.E.) — Artificial Intelligence & Machine Learning

Dec 2021 – Jun 2025

Savitribai Phule Pune University (SPPU)

CERTIFICATIONS

- Johnson & Johnson — Robotics and Controls Job Simulation
- Machine Learning with Python — YHills
- Python — Certified

CORE STRENGTHS

- Designing and shipping REST APIs that are clean, well-documented, and production-ready from day one
- Bridging backend engineering with applied AI — integrating ML models and NLP directly into live API endpoints
- Comfortable owning features end-to-end: data layer, business logic, API design, and deployment
- Fast learner who adapts quickly to new codebases, tech stacks, and agile sprint-driven team environments
